

PORTFOLIO INTRODUCTION

Umar Musa Isah

Aspiring Data Analyst | Excel | SQL | Power BI | Python | NGO / UN Analytics

Professional Summary

Umar Musa Isah is a results-driven aspiring Data Analyst with practical skills in data cleaning, dashboard development, reporting, and business insight generation.

He specializes in transforming raw data into clear and actionable information using Microsoft Excel, Power BI, SQL, and Python. His work focuses on building dashboards, generating structured datasets, analyzing trends, and producing professional reports for decision-makers.

He has a strong interest in humanitarian, development, and impact-driven organizations, with portfolio projects inspired by UNICEF, WFP, and UNDP reporting environments.

Core Skills

- Data Cleaning and Preparation
 - Dashboard Development (Power BI)
 - Excel Analysis and Reporting
 - SQL Querying and Data Extraction
 - Python for Dataset Generation and Automation
 - KPI Monitoring and Performance Tracking
 - Data Visualization
 - Report Writing and Presentation Design
-

Featured Portfolio Projects

1. UNICEF Education Performance Dashboard

A professional analytics project focused on monitoring school enrollment, attendance rates, teacher allocation, and education performance indicators in Kano State, Nigeria.

2. WFP Food Security Dashboard

A data dashboard project designed to analyze food access, household vulnerability, market trends, and nutrition-related indicators.

3. UNDP M&E Indicator Tracker

A monitoring and evaluation project built to track program KPIs, targets versus achievements, and implementation progress.

Career Objective

To secure a Data Analyst, Monitoring & Evaluation, or Reporting role where I can apply data tools and analytical thinking to support evidence-based decisions, improve operational performance, and contribute to impactful programs.

Value Proposition

Umar brings a combination of technical skills, structured thinking, and strong reporting ability. He is committed to continuous learning and passionate about using data to solve real-world problems.

Tools & Technologies

- Microsoft Excel
 - Power BI
 - SQL
 - Python
 - PowerPoint
